# User Stories and Tasks

CampusMarket | Cape Peninsula University of Technology

## About these user stories

A user story describes a feature from the end-user's point of view using the format: As a [type of user], I want [a goal], so that [a reason]. Each story has acceptance criteria that tell us when it is done, and is broken down into tasks that team members pick up on the Trello board. Priorities use the MoSCoW method (Must, Should, Could).

## User stories

| ID | User story | Acceptance criteria | Tasks | Priority |
|---|---|---|---|---|
| US-01 | As a student, I want to sign up and log in, so that my listings and purchases are tied to me. | • A new user can register with their details.<br>• A registered user can log in and out.<br>• Protected pages redirect to the login page when the user is not signed in. | • Connect Supabase database and auth<br>• Build login and register screens<br>• Add protected routes<br>• Add authentication middleware to the API | Must |
| US-02 | As a seller, I want to list an item with a photo and price, so that other students can find it. | • The listing form captures title, description, price, category and image.<br>• Only a signed-in user can create a listing.<br>• The new listing appears in the marketplace. | • Build the create-listing form<br>• POST /api/products (auth required)<br>• Image handling with a fallback placeholder | Must |
| US-03 | As a buyer, I want to browse products, so that I can find what I need. | • Products are shown in a grid with image, title and price.<br>• The page works well on a phone screen. | • GET /api/products<br>• Build the marketplace product grid<br>• Mobile-first layout | Must |
| US-04 | As a student or staff member, I want to post a campus notice that expires, so that the board stays current. | • A signed-in user can publish a notice with a title, content, type and expiry date.<br>• Expired notices no longer appear on | • POST /api/bulletin_posts (auth required)<br>• GET /api/bulletin_posts with an expiry filter | Should |
